

Filter unit F-781 is the disposable dry gas filter unit.

1. Exchange the filter unit after*:
paper - 10 000 km
polyester - 10 000 - 15 000 km
glass fibre - 15 000 - 20 000 km
bulpren - 15 000 - 20 000 km
or after 12 months.
2. Install the filter according to the flow direction shown on the body (a pointer).
3. Avoid any mechanical damages while installing the filter unit and during its usage.
4. Install the filter on the hose of a suitable diameter for its connector pipe. Do not struggle.
5. Do not use with pressure over:
10,5 Ba – LPG
9 Ba – CNG
6. Work temperature range from -40°C to 120°C.
7. Check the installation tightness after installing the filter.
8. Hold all installation, exchanging the filter unit and any repairs in the certified services.
9. Install not to damage any flexible hoses.
10. Use the filter only for what it was intended.

* Liveliness of the filter unit depends on the fuel quality. It is recommended to refuel in the certified petrol stations.
